

Veterinary Histopathologist

Work at the forefront of aerosol technology

An exciting opportunity has arisen for a Veterinary Histopathologist, to join a talented multi-disciplinary pre-clinical research & development team within a truly global FMCG. Located in the heart of the scientific community in Singapore, this research team are dedicated to the development of next generation product technology.

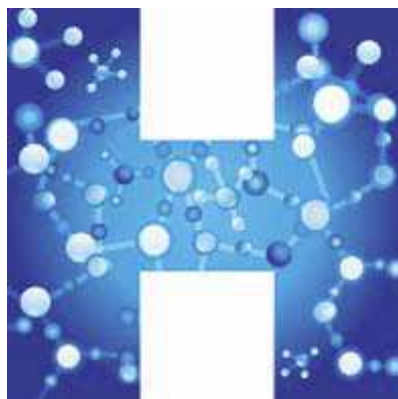

Innovation requires expertise and imagination; with this in mind, we are searching for a thought leader in histopathology. You will develop novel assessment methods for the analysis of the respiratory tract tissues exposed to aerosols during critical inhalation studies. Through the development, ownership and publication of your biological methods; you will have the potential to significantly contribute to the medical advancement of respiratory and lung diseases.

The ideal candidate will be a qualified DVM/BVSc or hold a PhD in a relevant biological subject with significant *in-vivo* rodent research experience. You will have a minimum of five years research experience in histopathology; with demonstrated expertise in the latest histoprocessing techniques and digital histopathology. Knowledge of and preferably working experience in an OECD GLP and AAALAC accredited laboratory environment would be advantageous.

In return, you will be rewarded generously in an organisation which nurtures talent and strongly encourages individual growth & development. Relocation support for the individual and your immediate family will be provided.
