OPPORTUNITY IN VETERINARY CLINICAL PATHOLOGY

[CTDS 2015 Ltd](#) is part of the [Veterinary Pathology Group](#) (UK and Ireland) and is based near Leeds in West Yorkshire.

We are looking for an experienced, suitably qualified clinical pathologist, with RCVS registration, to join our team. We would ideally welcome an individual interested in business development and the provision of external education. We offer a highly competitive salary based on your qualifications and experience, a generous performance related bonus scheme as well as a company pension scheme and paid CPD allowance.

The group has a strong pathology team of European and American boarded clinical and anatomic pathologists and provides quality diagnostic services in haematology, clinical chemistry, endocrinology, cytology, histopathology, toxicology, PCR, and microbiology for first and second opinion practices and tertiary referral institutions.

Our caseload is predominantly dogs and cats with avian and reptiles constituting approximately 5-10% of cases and a similar proportion of equine submissions.

You are invited initially to discuss the role informally, and in complete confidence, with the Veterinary Director Nick Carmichael who can be contacted via email to recruitment@ctdslab.co.uk or by telephone on 00 44 113 287 0175.

Further information about The Veterinary Pathology Group can be found [here](#).
