

VETERINARY CLINICAL PATHOLOGIST (M/W)

Our company

The CiToxLAB Group is a global preclinical service provider with facilities in France, Canada, Denmark and Hungary.

CiToxLAB offers a comprehensive range of pre-clinical services to meet the needs of pharmaceutical, biotechnology and chemical companies worldwide. These include general and reproductive toxicology, carcinogenicity, bioanalysis, immunology and safety pharmacology with special expertise in areas such as NHP and minipig research.

Our French facility, located in Evreux (one hour from Paris), is looking for a Veterinary Clinical Pathologist.

Key duties and responsibilities

- Supervise and coordinate all activities in clinical pathology, including scientific and technical management of the clinical pathology lab
- Provide scientific and technical expertise in clinical pathology according to client's requirements
- Oversee clinical pathology analyses on a wide variety of laboratory species
- Review clinical pathology data in a timely manner for accuracy and completeness
- Evaluate and write clinical pathology reports in support of the toxicology program
- Support qualification and validation of equipment and methods
- Investigate and implement initiatives for continuous process improvements
- Interaction with scientists and clients to communicate the significance of the clinical pathologic findings
- Maintain a consistent high level of productivity in the department as per industry standards
- Stay current in the science of toxicological clinical pathology, and remain informed on all legislation and developments related to the job through self-education and external training
- Promote interaction/collaboration between Clinical Pathology, Pathology and other Disciplines
- Ensure that work performed is in accordance with the requirements of the study plan and in full compliance with GLP (where these conditions apply)
- Understand, respect and consistently apply Standard Operating Procedures (SOP)
- Perform any other reasonable tasks that may be required
- Attend scientific meetings and continuing education seminars
- Author scientific manuscripts and give presentations

Working environment

Work in an office environment and often in the clinical pathology laboratory. Spend occasionally a few hours at a microscope. Considerable sensory attention is required on a regular basis. Extreme sensory attention is required at times. Work schedule requires flexibility as per job requirements.

Qualifications

- A Doctorate in Veterinary Medicine or equivalent, and a formal Residency training in Veterinary Clinical Pathology are required.
- Board certification by the American College of Veterinary Pathologists (ACVP) or European College of Veterinary Clinical Pathologists (ECVCP) is required
- Previous experience in toxicologic clinical pathology from a Contract Research Organization or pharmaceutical industry is required
- PhD is preferred but not required
- Supervisory/Managerial experience
- Strong knowledge of related legislation, principles, practices and procedures
- Oral and written English required. French is a definite asset
- Excellent oral and written communication and interpersonal skills
- Strong problem solving and analytical skills
- Demonstrated leadership ability
- Working knowledge of related computer applications
