

Veterinary Clinical Pathologist at Vetdiagnostix Veterinary Pathology Services – Cape Town

This is your chance to work in beautiful Cape Town, South Africa. We have a full-time position available. Our focus is primarily on small animals and equines, but we also receive submissions from production animals and exotics. We collaborate closely with other members of our group in anatomical pathology and microbiology.

Primary duties and responsibilities:

- Microscopic analysis and reporting on clinical pathology submissions including cytology, fluid analysis, urine cytology and haematology reviews. Many of our submissions are from specialists in veterinary medicine and surgery.
- Interpretations on endocrinology, molecular biology and serology.
- Case discussions with referring veterinarians via telephone or electronic media.
- Participate in quality control and development and validation of new tests.
- Supervise and collaborate with technologists, assistants and administration staff.

Salary is competitive and commensurate with experience. CPD is encouraged and supported. Flexible working hours and a good leave allocation further make this a great position to be in. This position will be based at our premises in Bellville, Cape Town.

Applicants should have a qualification registrable with the South African Veterinary Council.

To apply for this position, please send your CV and covering letter by email to Corné Krog at corne.krog@tah.co.za. Any informal enquires are also welcome.
