

## CLINICAL PATHOLOGIST AT DICK WHITE REFERRALS

Due to continued expansion of our laboratory, we are looking for an enthusiastic veterinary clinical pathologist to join our team of 5 clinical pathologists and 3 anatomic pathologists at Dick White Referrals (DWR), near Cambridge, UK.

The laboratory is within the busy hospital at DWR, which is undergoing expansion, and we look forward to moving into our new state of the art laboratory. Much of our work is from referred patients at DWR and other referral hospitals in the UK, but we also receive 1<sup>st</sup> opinion samples, providing a varied and interesting workload. We enjoy interacting with our clinical colleagues in the hospital and with our radiologist and anatomic pathologist colleagues, allowing for tailored individualised reports and excellent feedback and discussion of cases.

Primary duties include the evaluation and interpretation of clinical pathology results (haematology, biochemistry, endocrinology) and cytology samples. We have a busy flow cytometry service so an interest in haematopathology would be advantageous (but not essential). We are actively involved in training of residents, and take part in seminars, journal clubs and research projects.

There is a generous salary package and holiday allowance as well as allowance for CPD and study leave and lecturing at conferences is strongly encouraged.

A board-certified person is preferred although a board eligible candidate would also be considered. Full or part time working are both possible.

To apply for this position, please send your CV and covering letter by email directly to Butty Villiers at [ev@dwr.co.uk](mailto:ev@dwr.co.uk). For further information please email or call Butty on +44(0)1638 572902.
