

ACCP MORPHOLOGY TRAINING

To be held concurrently with:
13th ANNUAL EHF MEETING

20th and 21st October 2015

Hellidon Lakes Golf & Spa Hotel, Daventry

This Cell Morphology Workshop will be a combination of **presentations** and **hands-on working at the microscope** with supervision and support.

Topics to be covered;

- Identification of nucleated cells in blood films
- **White cell differential** on common experimental animal species; e.g. rat. Mouse, primate, dog, mini-pig, hamster, chicken
- Identification of cells in bone marrow
- Bone marrow cell counting; including performing a **Myeloid/Erythroid ratio**
- Review of red cell morphology
- A review of the effect of **toxicological changes** to the cell populations seen in the blood film and the bone marrow smear

PLACES ARE LIMITED
