

## **Veterinary Clinical Pathologist**

Charles River Laboratories – US Safety Assessment is seeking to hire a veterinary clinical pathologist for our Nevada laboratory (Charles River Laboratories–Nevada). Charles River Laboratories–Nevada employs a multidisciplinary group of scientists and technical staff that conduct investigative and IND-enabling preclinical studies in non-human primates, dogs and rats for drug development for pharmaceutical companies. The clinical pathology laboratory is equipped for hematology, clinical chemistry, coagulation, urinalysis and other specialty analyses. The successful candidate will join locally 3 board certified clinical pathologists and a laboratory staffed by 8 medical technologists and twenty support technicians and globally, a group of 13 board certified clinical pathologist located in USA, Canada and France. In addition, the Clinical Pathology department in Nevada interacts with a highly qualified staff of 9 board certified anatomic pathologists and 25 toxicologists and laboratory animal medicine veterinarians. The primary responsibility of this position is the interpretation of study-related clinical pathology data and the generation of a clinical pathology report, as well as cytologic evaluations (i.e. bone marrow, blood smear, and effusions). Additional responsibilities include participation in scientific activities/projects related to clinical pathology within the organization. Requirements: 1) D.V.M/V.M.D. and board certification in clinical pathology by the American College of Veterinary Pathologists (board eligible candidates may apply), 2) excellent oral and written communication skills, and 3) team-oriented interpersonal skills. Charles River Laboratories–Nevada is located in Reno, Nevada and is approximately 45 minutes from Lake Tahoe. Charles River Laboratories offers a competitive salary and excellent benefits.
