

Clinical Pathologist for True North Veterinary Diagnostics, Canada

Organization: True North Veterinary Diagnostics Inc.

Date Needed: March 2022

City: Langley

Province: British Columbia

Country: Canada

Primary Category: Diagnostic Veterinary Clinical Pathologist

Type of Position: Full-time (preferred) or locum; on-site

Education Requirements: DVM, Board certified in Clinical Pathology or board eligible

#### Description & Details

True North Veterinary Diagnostics is a private veterinary laboratory located in beautiful British Columbia, Canada. We are looking for an on-site Clinical Pathologist to join our close-knit team in March/April 2022. We are hoping to fill a full-time position, but those wishing to locum will be considered, and are welcome to apply. Vancouver enjoys a warmer climate compared to the rest of Canada, and is a favourite with outdoor enthusiasts. Find mountains, ocean and vibrant city life at your doorstep!

Our team consists of four Clinical Pathologists and one Anatomic Pathologist on site, as well as three remote Anatomic Pathologists and an Internist. True North Veterinary Diagnostics provides services including hematology, clinical chemistry, endocrinology, microbiology, cytology and histopathology/ immunohistochemistry, servicing British Columbia and parts of Alberta. Our caseload is almost exclusively companion animal.

Duties will include providing written interpretations on hematology/chemistry/ urinalysis/ endocrinology reports, preparing cytology reports, review of hematology slides and consultation with veterinarians. We pride ourselves on providing excellent customer service to our referring veterinarians, and are looking for a candidate with good communication skills who enjoys discussing cases with our veterinarians.

Salary is competitive and commensurate with experience. Candidates having recently completed residency training are welcome to apply. True North offers an excellent benefits package including time and monetary support to attend one continuing education conference per year for full-time pathologists.

Applicants must have post-graduate training in clinical pathology and ideally should be board certified by the ACVP/ECVP or in the process of preparing for certification. Experience in clinical pathology is essential. Candidates must be licensed in or eligible for licensure in Canada and British Columbia.
